SUMMARY

Full Stack Developer with over 6 years of experience in web development, working end to end with Node.js and TypeScript on the back end (REST APIs, authentication, payment integrations, PostgreSQL/MySQL) and React, Next.js and Angular on the front end. I built and run Koinonia One in production, a multi-tenant SaaS for church management with paid plans, owning architecture, code, recurring billing and product evolution. I use AI in a structured way across the whole development cycle, with specs for agents, project rules and critical review of generated code, shipping faster without sacrificing quality or testing.

TECHNICAL SKILLS

Back end: Node.js, TypeScript, Express.js, Python, REST APIs, authentication, payment integrations (Stripe, Efi Bank), multi-tenant architecture

Front end: React, Next.js (SSR/SSG), Angular, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, RTK Query, TanStack Query (React Query), React Hook Form, Zod, Design Systems, accessibility (WCAG), technical SEO

Databases: PostgreSQL, MySQL; ORMs: Prisma, Drizzle, TypeORM

Testing: Vitest (unit testing), Jest, Playwright (E2E)

Cloud/DevOps: CI/CD

Mobile (secondary): React Native

Practices: Clean Architecture, SOLID, Clean Code, Scrum/Agile methodologies

Tools: Git, GitFlow, Figma

AI-assisted development: AI-assisted coding (Cursor, GitHub Copilot, Claude Code), Spec-Driven Development (specs/PRDs for agents), context files and project rules (AGENTS.md, CLAUDE.md, .cursor/rules), MCP, prompt engineering and critical review of AI-generated code

AI in products: LLM integration (OpenAI/Anthropic APIs), RAG, embeddings and agents

PROFESSIONAL EXPERIENCE

Full Stack Developer — Alcif | Jan 2024 – Present

Stack: Node.js, TypeScript, React, Angular, REST APIs, relational database, Prisma, Drizzle, Vitest (unit testing), Playwright (E2E testing), React Native

- Develop back-end services and REST APIs in Node.js and TypeScript to integrate systems, automating operational and business processes and cutting manual work by more than 40%.
- Build front-end features in Angular and React with TypeScript, delivering features end to end, with data modeling and data access on a relational database via Prisma and Drizzle.
- Implemented unit tests with Vitest and E2E tests with Playwright covering critical flows, making releases safer and more predictable.
- Built a React Native mobile app for lead capture integrated with payment gateways, and contribute to architecture decisions focused on performance, reliability and scalability.

Front-End Developer — Nexus | Jul 2023 – Nov 2024 (concurrent, contract/freelance)

Stack: Next.js, React, TypeScript, Git/GitFlow

- Developed web applications with Next.js, React and TypeScript, applying rendering optimizations and technical SEO for faster, better-indexed pages.
- Integrated REST APIs into the front end and built reusable components with responsive, accessible (WCAG) interfaces.
- Worked on an agile team using Git and GitFlow for version control and the delivery workflow.

UX Designer / Front-End Developer — Hero99 | Oct 2022 – Jul 2023

Stack: Webflow, JavaScript, Figma

- Developed interfaces and landing pages with Webflow and JavaScript, including interactions, animations and responsive layouts for multiple clients.
- Collaborated with cross-functional teams on digital products focused on usability and performance.

UX Designer — NOSON Inc | Mar 2022 – Aug 2022 (*concurrent, contract/freelance*)

Stack: *Figma*

- Created user flows, wireframes and high-fidelity prototypes in Figma for the Park vs Ride and On Air Parking platforms.
- Designed user-centered experiences for web products and mobile apps.

UX Designer & Front-End Developer — Ágil Desenvolvimento de Sistemas | May 2021 – Dec 2022

Stack: *Front-end development (responsive web interfaces), Figma*

- Developed responsive interfaces for web systems and digital applications, with a focus on usability.
- Collaborated with cross-functional teams to deliver user-experience-driven digital products.

PROJECTS

Koinonia One — Church management SaaS | koinoniaone.com (*in production*)

Stack: *Next.js, React, TypeScript, Node.js, Express.js, Redux Toolkit, RTK Query, React Hook Form, Zod, Stripe*

- Designed, built full stack and run in production a multi-tenant SaaS for churches in Brazil, with paid subscription plans.
- Back end in Node.js, Express.js and TypeScript: REST APIs, authentication and subscriptions with recurring billing via Stripe.
- Front end in Next.js, React and TypeScript with Redux Toolkit/RTK Query and complex forms using React Hook Form + Zod.
- Modules for members, groups, calendar, volunteer scheduling, communication, finances, prayer requests and worship team management, in a modular architecture (Clean Architecture, SOLID).

MenuPlus — Delivery SaaS for restaurants

Stack: *Python, React*

- Built a full stack system with a Python back end and a React front end: customizable menus, product and order management, and a mobile-first experience.
- Implemented checkout with the Efí Bank payment gateway, REST APIs and dynamic forms, with a focus on performance and technical SEO.

EDUCATION

Bachelor's Degree in Civil Engineering

UNIFTC – Faculdade de Tecnologia e ciências | Completed in 2021

COURSES

- Full Stack Development – Curso.dev
- React.js & Next.js – B7Web
- Node.js – B7Web
- React Native – B7Web
- Google UX Design Professional Certificate

LANGUAGES

Portuguese — Native | English — Intermediate (technical reading)
